

Mohamed Raiyan

SOFTWARE ENGINEER | AI ENGINEER

Eskilstuna, Sweden | +46767516351 | raianmfm@gmail.com | <https://mohamedraiyan.github.io/>

Professional Summary

Senior Software Engineer and AI Engineer with 9+ years of experience building scalable backend systems, high-performance APIs, and AI-powered applications. Skilled in Python, JavaScript, and PHP, with hands-on expertise in LLM integrations, microservices, and cloud infrastructure. Recently completed an MSc in Computer and Systems Sciences at Stockholm University, with a thesis on generative AI and multimodal interaction.

Technical Skills

Languages	Python, JavaScript, PHP, Java
Frameworks	Django, FastAPI, Node.js, React, Laravel, CodeIgniter
Databases	PostgreSQL, MySQL, NoSQL, Airtable (2TB+ scale)
APIs & Services	REST, Shopify, eBay, AWS integrations
AI / LLM	OpenAI, Claude, LangChain, GitHub Copilot, RAG, Prompt Engineering, Fine-tuning, Multimodal AI
ML & Data Science	scikit-learn, pandas, NumPy, Classification, Clustering
Cloud & DevOps	Azure, Docker, CI/CD, Agile/Scrum

Experience

Imara Software Solutions | Senior Software Engineer / AI Engineer Jan 2019 – Mar 2026

- Designed and maintained scalable backend systems handling over 500,000 API requests daily across distributed cloud infrastructure.
- Experience developing and integrating AI-powered applications using Large Language Models (LLMs) and Small Language Models (SLMs), including OpenAI APIs, Claude, GitHub Copilot, and AI-assisted development workflows for automation, intelligent data processing, and productivity enhancement.
- Built and maintained scalable RESTful APIs and backend services using Python (Django, FastAPI) and Node.js, integrating React-based admin panels and internal tools, with a strong focus on performance, system integration, and reliable backend architecture.
- Containerized microservices with Docker and integrated CI/CD pipelines for automated testing, isolated environments, and smooth deployments across staging and production.
- Implemented monitoring dashboards to track API uptime, service health, and error rates using custom analytics tools.
- Led integration of third-party APIs such as Shopify, eBay, and AWS services for product sync, order processing, and secure payment flow.
- Managed high-volume PostgreSQL and MySQL databases (2TB+), with automated backups and optimized indexing.

- Contributed to cloud infrastructure automation and deployment processes, working with Azure services and containerized environments to support scalable production systems.
- Mentored junior developers, led sprint planning, and ensured agile practices were followed consistently.
- Accelerated internal tool development and business process automation by leveraging low-code/no-code platforms (make.com, Bubble) and managing structured data within NoSQL stores and tools like Airtable.

Imara Software Solutions | Software Developer

Nov 2014 – Dec 2018

- Built custom CMS solutions, dynamic web applications, and e-commerce platforms (product catalogues, cart, checkout) using PHP (Laravel, CodeIgniter), WordPress, HTML, CSS, and JavaScript.
- Implemented REST APIs and connected backend services to frontend via AJAX/JSON, alongside admin panel development for internal and client-facing tools.
- Managed MySQL databases including schema migrations and cross-site data syncing, with versioned deployments via Git-based CI pipelines.
- Delivered SEO-optimised, mobile-responsive websites and e-commerce platforms for small to mid-sized clients across full project lifecycles.

Education

Stockholm University, Master's degree, Computer and Systems Sciences

Sep 2023 - Oct 2025

- **Major:** Machine Learning, IT Management, Research Methodology, ERP Systems, AI, Internet of Things Services, Information Security, Data Mining, Cyber Forensics
- **Thesis: Programming through Sketching – Non-Linguistic Interaction with Generative AI.** Explored sketch-based UI generation using generative AI (HTML/CSS/React) via multimodal inputs.

University of Greenwich, Bachelor's Degree, Information Technology

2013 - 2014

Major: Web Engineering, Database Engineering, Programming Frameworks

Publications

- **Programming Through Sketching – Non-Linguistic Interaction with Generative AI**
 - Independent thesis, Advanced level (Master, Two Years) 20 credits / 30 HE credits
 - <https://www.diva-portal.org/smash/record.jsf?pid=diva2:1999524>
